

Overview

EON Environmental Consulting Ltd. is a SME consulting firm with offices in Niagara Falls and Dundas, Ontario, specializing in environmental geoscience and geotechnical engineering primarily in the Ontario market. We require an intermediate Environmental Geoscientist to join our focused team.

Responsibilities

Environmental site investigations including:

- Environmental and geotechnical drilling and test pitting.
- Knowledgeable of various geotechnical and environmental instruments, and surveying methods.
- Collection of soil and groundwater samples and data management.
- Detailed field logging.
- Phase I and Phase II Environmental Site Assessment(s) and Record of Site Conditions.
- Excess soil assessments.
- Designated Substance and Hazardous Materials Surveying.
- Hydrogeological field investigations.
- Subcontractor coordination and management.
- Technical report writing and a high-level quality assurance and quality control.
- Knowledgeable, understand, and work under the guidance of various Ontario regulations: O.Reg. 153/04, O.Reg. 511/09, and O.Reg. 406/19.

Minimum Requirements

- Bachelor's degree in Environmental/Earth Science or related field. Masters degree a plus.
- Registration with Professional Geoscientists Ontario (PGO) or Professional Engineers Ontario (PEO).
- Five (5) years experience with environmental site assessment investigations in Ontario.
- Excellent technical report writing skills.
- Proficient with AutoCAD for mapping and design tasks.
- Proficient with Microsoft Suite (Word, Excel, and Outlook), and PDF.
- Experience with hydrogeological investigations and data analysis software.
- Ontario G license and own vehicle available for daily job related use.
- Able to obtain government security clearances if required.
- Salary/Wage to be determined based on knowledge, experience, and capabilities.
