

Premier Environmental Services Inc. is seeking an experienced Senior Environmental Engineer or Geoscientist in the Greater Toronto Area, Kitchener-Waterloo-Cambridge Area, or Ottawa Area to assist us with our continuous expansion program.

The ideal candidate will have plenty of experience with environmental site assessments, contaminant remediation projects, risk assessments, and project management. Responsibilities include business development, client liaison, technical QA/QC and project management. The candidate must demonstrate exceptional technical and client management skills coupled with a multidisciplinary approach to problem solving.

### **Qualifications:**

To be considered for this position the candidate must have the following qualifications:

- 15 years or more of experience in the environmental site assessment and remediation consulting industry in Ontario.
- P.Eng. or P.Geo. license in good standing in Ontario.
- Qualified Person (QP) designation for Environmental Site Assessments.
- Track record of completing technically difficult subsurface assessment and remediation projects, environmental risk assessments, and filing Records of Site Condition (RSC).
- Portfolio of existing business developed from sales activity.
- Valid Ontario drivers license with a satisfactory driving record suitable for business travel.
- The ability to travel freely to the USA if required.
- Ability to speak French is an asset, although not required.

### **Job Tasks:**

Responsibilities associated with this role include, but are not limited to the following:

- Developing new business with existing clients, and attracting new clients.
- Writing and reviewing proposals, reports and technical documentation.
- Managing and mentoring junior and intermediate employees.
- Project Management.
- Facilitating and managing both internal (team) and external (client-facing) meetings.
- Writing informative blogs, newsworthy articles, and technical papers on relevant industry information.
- Overall leadership within the company and amongst colleagues.
- Providing technical expertise to law firms, insurance companies and real estate owners on contaminated sites issues.
- Identify opportunities for growth and cross-collaboration across various services.

## **Why Choose Premier Environmental Services Inc.?**

- Premier has been operating for 20 years with a strong client base and industry reputation.
- Premier takes a personal approach to all business interactions, prioritizing client relationships and exceptional service.
- Premier prioritizes professional development and growth within the organization, providing employees opportunities for career advancement.
- Premier treats all employees with equity and respect, and strives to maintain an inclusive work environment.
